

Sumit Makwana

Full Stack Developer & AI Engineer

Gujarat, India • hello@sumit11.tech • sumit11.tech • github.com/sumitmakwana • linkedin.com/in/sumit-makwana

SUMMARY

Full stack developer focused on building reliable, well-structured web systems and layering practical AI features on top of them. Comfortable across the stack, from schema design and REST APIs to responsive, animated frontends.

EXPERIENCE

Software Developer Intern — Company Placeholder

Jun 2025 – Present

- Built and shipped full-stack features end to end, from schema design to production UI.
- Reworked slow database queries, cutting a key report's load time significantly.
- Paired closely with senior engineers to learn production-grade code review practices.

PROJECTS

Restaurant POS System

React, Python, MySQL, AI Chatbot

Point-of-sale system with real-time order management, billing, and an AI chatbot for menu queries and upsells.

Food Delivery Microservices

Spring Boot, Docker, Grafana

Microservices backend for food delivery with independent order, payment, and delivery-tracking services.

Online Freelance Management System

Java, MySQL

Platform connecting freelancers and clients with project postings, bidding, and payment milestones.

AI Resume Assistant

Python, LLM

LLM-powered assistant that reviews resumes against a target job description and suggests edits.

SKILLS

Java, Python, JavaScript • React, Tailwind CSS, HTML, CSS • Spring Boot, FastAPI, MySQL, REST API • AWS, Docker, Git, GitHub • AI / ML, Prompt Engineering
