PROFESSIONAL SUMMARY

Passionate Full Stack Developer and AI enthusiast with strong proficiency in Python and Java, along with experience in building scalable web applications and AI-powered solutions. Skilled in frontend and backend development, REST APIs, databases, and modern development frameworks. Quick learner with strong problem-solving abilities and a passion for writing clean, efficient code. Looking forward to contributing to Simform by building innovative software solutions while continuously enhancing my technical and professional skills.

KEY EXPERTISE

Full Stack Development Python Development Java Development REST API Development MySQL React.js TailwindCSS

EDUCATION

Institute of technology, Nirma University M.C.A. - Computer Applications CGPA: 7.78 / 10	2025 - 2027
Dr. V. R. Godhania College of Engineering & Technology B.C.A. - Computer Applications (Full Time) CGPA : 8.28 / 10	2022 - 2025
Saint Mary'S English Medium School, Porbandar 12 th GSEB Percentage: 45.85 / 100	2022
Saint Mary'S English Medium School, Porbandar 10 th GSEB Percentage: 74 / 100	2020

PROJECTS

LeaseEasy (Context-Aware AI Support Bot for Real Estate SaaS Platforms) Team Size: 1 Key Skills: React.js Node.js TailwindCSS RESTful APIs Project Link: https://github.com/MakwanaSumit11/LeaseEasy LeaseEasy AI Full Stack & AI Developer Built LeaseEasy AI, a context-aware virtual assistant integrated into a property management SaaS dashboard to automate landlord-tenant communications, billing queries, and maintenance logistics. Leveraged LLM Function Calling / Tool Use to allow the chatbot to securely query a mock PostgreSQL database to check tenant payment statuses, log new maintenance tickets, and calculate late fees dynamically. Designed and developed a responsive React web interface featuring a sleek floating support widget, achieving seamless integration with the SaaS platform's dashboard. Engineered prompt templates and context-retrieval mechanisms that enable the bot to accurately interpret complex lease clauses and draft professional, legally-aligned responses for landlords.	20 May, 2026 - 24 Jun, 2026
SplitEasy (Expense Splitter) Team Size: 1 Key Skills: Flutter Firebase Deep Linking (UPI Intent Integration) Project Link: https://github.com/MakwanaSumit11/SplitEasy SplitEasy Designed and built a dynamic, real-time expense-splitting mobile application using Flutter and Firebase, featuring dual light/dark theme support with persistence using shared_preferences. Implemented instant P2P payment routing by constructing custom UPI deep links (upi://pay) and launching system-level payment sheets (Google Pay, PhonePe, Paytm) via url_launcher. Integrated QR code generation and live camera scanning using mobile_scanner to streamline group creation and instant joining flows. Optimized screen render performance and keyboard focus stability in Firestore-backed text inputs by caching database streams and resolving UI jitter.	01 May, 2026 - 26 May, 2026

Secured data access using database security rules (firestore.rules), restricting read/write queries exclusively to validated group members.

BeatIT (Music Feature Segregation using K-Means Clustering)

01 Feb, 2026 - 24 Mar, 2026

Key Skills: Python Streamlit K-Means Clustering Scikit-Learn

Project Link: https://github.com/MakwanaSumit11/BeatIT_Genre_Segregation

BeatIT Genre Segmentation: K-Means Clustering App | Python & ML Developer

Developed an interactive Streamlit web application for Exploratory Data Analysis (EDA) and unsupervised machine learning on music datasets (e.g., Spotify Million Song Dataset). Engineered a data preprocessing pipeline using scikit-learn to standardize high-dimensional audio features (danceability, energy, valence, tempo, loudness) using StandardScaler for unbiased clustering. Implemented K-Means Clustering with configurable cluster counts (k=2 to 10) to segment music tracks into distinct sonic profiles based on mathematical feature similarities. Created interactive 2D and 3D scatter plots, Plotly correlation heatmaps, and genre distribution charts to allow users to visually inspect cluster separation and statistical profiles. Designed a content-based music recommendation framework using the resulting cluster groups as a foundation for personalized track suggestions.

EXTRA CURRICULAR ACTIVITIES

- Secured 1st Place in Inter-College Chess Championship x 2

PERSONAL INTERESTS / HOBBIES

- Chess
- Cricket
- Reading Newspaper
